Meal delivery

Pushing tall trolleys from behind can block your line of sight. Front of load towing with a Transpak Powered Trolley helps avoid collisions by ensuring a clear view of what's ahead.

Designed for meal system movers, this powerful machine will help your staff manoeuvre tight hallways and blind corners with ease, certain that they won't be colliding with patients, medical equipment, or medical staff.

Meal system movers are:

- Quiet to operate with zero emissions
- Easy to drive with no license required
- Covered by a comprehensive 12 month warranty
