

Fork Lift Master Wheel

Drive and running wheels for stackers and forklift trucks

kg 1,000 ~ 2,500 kg

✓ RoHS

- ✓ Solid structure with steel core
- ✓ Optimal to various Fork Lift Wheels to be operated at harsh conditions
- ✓ Excellent abrasion resistance and adhesion with high quality polyurethane
- ✓ Minimized vibration noise through precise design
- ✓ Polyurethane product group with diverse functions

Our Fork Lift Wheel provides highest solutions to any requirement of clients based on incessant investment in product development and knowhow. High quality wheels manufactured by the best technology and facility are the proud of G-dok incorporating safety through technology.

Division	Standard	Model	Wheel dia(D) [mm]	Wheel width(W) [mm]	Application [SPEC]	Details
DOOSAN	DRIVE WHEEL	FLDD-D343xW140	343	140	BR 20~25	<ul style="list-style-type: none"> ✓ Cast PU ✓ Steel core ✓ Ball bearing ✓ Excellent abrasion resistance ✓ Minimize noise and vibration

◦ NDI Best polyurethane is available(premium)

NDI

✓ NDI Premium Urethane

- Excellent abrasion resistance as high-end polyurethane
- Resistance to tear or crack is particularly excellent
- Optimal for driving equipment with high restoring property, when operating after a stoppage
- Extremely strong against particles and deformation stress
